1.5. Request DynDNS --Test	2
2. Owned domain	2
2.1. Buy it on:.....	2
2.2. Configuration with STRATO	2

1. DynDNS

1.1. Installation

```
sudo apt-get install ddclient
```

```
sudo apt-get update && sudo apt full-upgrade -y && sudo reboot
```

1.2. Create a DynDNS

<https://my.noip.com/dynamic-dns>

1.3. Configuration with no ip service

```
sudo nano /etc/ddclient.conf
```

Paste the following:

- protocol=noip
- use=web
- web=checkip.dyndns.org
- server=dynupdate.no-ip.com
- login=username
- password='password'
- stevan.ddns.net

1.4. Restart DynDNS

```
sudo /etc/init.d/ddclient restart
```

1.5. Request DynDNS --Test

```
sudo ddclient -daemon=0 -debug -verbose -noquiet
```

2. Owned domain

Example with Strato

2.1. Buy it on:

<https://www.strato.de/buy/ger/domain>

2.2. Configuration with STRATO

```
sudo nano /etc/ddclient.conf
```

Paste the following:

- protocol=dyndns2
- use=web
- server=dyndns.strato.com
- login=example.de
- password='password' example.com
